CORY RICHERSON

FULL-STACK SOFTWARE ENGINEER

💼 EXPERIENCES

2016
|
Present

Senior Software Engineer
Doctor.com (formerly ConnectHealthcare)   📍 Atlanta, GA

- Helped maintain and develop new features for all existing enterprise product suites
- Co-designed and developed the new SaaS enterprise suite of products from the ground up
- Aided in project planning, deployment schedules, and technical & non-technical stakeholder documentation
- Guided a developer culture shift towards maintainability, continuous integration testing, and improved team workflow

August 2013
|
December 2016

Software Engineer
Doctor.com (formerly ConnectHealthcare)   📍 Atlanta, GA

- Worked on the maintenace development team to aid in fast turnaround debugging and patching for all enterprise clients and products
- Developed and maintained custom data imports and front end features for all enterprise clients and products
- Helped design and build the largest custom product suite for the single largest client account (at the time of work)

📂 SELECTED PROJECTS

2016
|
Present

ProviderConnections Product Suite
Doctor.com (formerly ConnectHealthcare)

- Co-designed and developed new iterations of all the enterprise suite of products, ProviderConnections
- Developed all backend authentication and security features
- Designed and developed backing database services and data warehousing
- Ensured performance and data integrity with enterprise's first single app SaaS product suite

2015

Providence (PH&S) Redesign
Doctor.com (formerly ConnectHealthcare)

- Completed redesign the system architecture of a product suite for the single largest client
- Worked directly with CTO, project managers, and all key stakeholders to manage scope and design
- 3 month turnaround to launch, when the 1st design took over a year, and all known previous vendor attempts at implementing the project failed
- Helped design and develop: the database architecture and all relative services, backend server architecutre, front end design, SSO with PH&S, and the largest and most complicated data import of all enterprise clients
- Mentored Jr. developers and hand-off to maintenance team
